

CSM Roles & Responsibilities

Route 3 contracts require a structured governance model, clearly defined responsibilities, and proactive supplier engagement.

These contracts usually involve essential services, large budgets, complex performance requirements, reputational exposure, or financial/operational risk.

Managing the supplier contractual relationship requires a discrete set of responsibilities and activities. An organisation should consider how to ensure that:

- roles and responsibilities are clear
- the relationship is championed at senior levels in the Organisation and supplier organisations
- information sharing is encouraged
- concerns about relationships, from either party, can be discussed frankly
- the relationship allows for long-term strategic issues as well as day-to-day delivery issues to be considered

These considerations should be built into the commodity/service specification and/or the terms and conditions of the contract.

The Contract Manager should be engaged early in the process. This will ensure they engage early with stakeholders and determine the appropriate contract service level requirements and Key Performance Indicators. Service level and Key Performance Indicators (KPIs) requirements should have been included in the tender documentation.

Please note that purchases of goods and services may routinely be the subject of [Freedom of Information \(FoI\)](#) requests.

Governance Structure

Open or close

Recommended Governance Tiers

1. Organisation Board/Senior Management Team
2. Senior Responsible Owner (SRO) / Contract Owner
3. Contract Manager (Operational Lead)
4. Commercial / Procurement Team
5. Technical / Service Leads
6. Finance Lead
7. Risk & Assurance / Legal
8. Supplier Relationship Manager (if formal model used)
9. Contract Users / Operational Stakeholders
10. Supplier-side Contract Manager

This structure supports accountability, escalation, transparency, and effective decision-making.

Roles and Responsibilities

Open or close

Organisation's Board / Senior Management Team

Board / Senior Management sponsorship is critical to the success of an embedded Contract and Supplier Management approach.

The Board / Senior Management Team should take the ultimate strategic ownership of business critical strategic supplier(s). They should be fully committed to improving contract performance collaboratively with those suppliers.

Senior Responsible Owner (SRO) / Contract Owner

Overall accountability for contract outcomes.

Responsibilities

- Approves contract management strategy, KPIs, scorecards, and risk plans.

- Ensures compliance with [Scottish Procurement Finance Manual \(SPFM\)](#) and organisational governance.
- Chairs senior-level reviews (monthly/quarterly/biannual).
- Approves significant variations, extensions, or commercial decisions.
- Ensures adequate resources for effective contract management.
- Acts as escalation point for significant performance or financial risk.
- Provides reports to Executive Team or Board.

Contract Manager (Day-to-Day Lead)

Primary role for managing supplier performance and ongoing activities.

Responsibilities

- Develops and maintains the contract management plan.
- Manages KPI reporting, [Balanced Scorecard](#) and performance reviews.
- Oversees delivery of services against specification/SLA.
- Ensures continuous improvement and value-for-money initiatives.
- Maintains the contract risk register and ensures mitigating actions.
- Manages contract variations, change control, and compliance.
- Coordinates quarterly contract meetings and performance boards.
- Ensures accurate documentation and audit trail.

In addition, every contract should be managed by a nominated member of staff ('contract manager/contract management officer'). In a collaborative setting, organisations should determine which organisation will take the lead in managing the contract. An organisation should ensure that there is clarity about the distinction between:

- contract management (the responsibility of the organisation)
- service management (the responsibility of the supplier)

The Contract Manager should have the mind-set to exceed rather than meet required goals. They will, deal with a constantly changing set of requirements. They need excellent communication and stakeholder management skills. They should be the principal owner of the supplier relationship and contract performance. They will be responsible for business-to-business relationships, contract management

performance and contract management competencies, including:

- monitoring contract and supplier performance against KPIs and other specified performance indicators (in partnership with contract management contributors and end users).
- monitoring 'take-up' and spend through the Framework or Contract
- managing any reactive/unplanned issues which arise in relation to the contract(s)
- communication of performance and efficiency gains as a result of MI analysis
- drafting and issuing supplier or customer surveys where appropriate
- chairing and managing performance reviews with the supplier. This includes end user feedback, and disseminating outcomes
- managing any major performance issues and complaints
- facilitating and championing supply chain innovation, continuous improvement initiatives and best practice
- managing Framework Agreement variations, and communicating outcomes
- managing the extension of any optional extension periods (and/or the re-tender process and the supplier Exit Strategy)
- providing guidance and advice to end users as necessary
- MI validation

Procurement / Commercial Team

Provides strategic commercial assurance and compliance oversight.

Responsibilities

- Advises on governance, contractual interpretation, and commercial risk.
- Oversees contract variations, ensuring legal/commercial compliance.
- Supports annual contract reviews and strategic supplier assessments.
- Ensures adherence to Procurement Journey requirements.
- Provides market intelligence and benchmarking for Route 3 suppliers.
- Supports re-tendering and transition planning.
- Escalates issues involving non-compliance, breach, or poor Value For Money (VFM).

Technical / Service Leads

Ensures the service delivered meets required operational standards.

Responsibilities

- Monitors technical KPIs (e.g., quality, service levels, system availability)
- Reviews technical incidents, root cause analysis, and supplier proposals
- Approves technical changes, solution upgrades, or configuration
- Confirms delivery of milestones, outputs, and deliverables
- Provides expert advice in performance review meetings
- Ensures security, data protection, and health & safety compliance

Finance Lead

Ensures financial governance and cost control.

Responsibilities

- Verifies supplier invoices, reconciliations, and financial performance
- Tracks budgets, forecast spend, and identifies cost variances
- Oversees financial risk (e.g., indexation, inflationary impact)
- Assesses gainshare, efficiency savings, or cost-avoidance proposals
- Supports financial viability assessments of the supplier
- Ensures compliance with finance regulations and the [Scottish Procurement Finance Manual \(SPFM\)](#)

Risk, Assurance & Legal

Provides corporate oversight and risk assurance.

Responsibilities

- Supports contract risk assessment and escalation
- Ensures compliance with legal, regulatory, and statutory obligations

- Reviews serious incidents, conflicts of interest, and audit findings
- Advises on disputes, breaches, or termination scenarios
- Ensures appropriate approvals for major variations

Supplier Relationship Manager

Used in mature organisations or for strategic suppliers.

Responsibilities

- Manages strategic partnership relations beyond day-to-day operations
- Facilitates innovation, improvement, and long-term planning
- Supports relationship health checks and strategic alignment reviews
- Provides insight to category strategies and portfolio management

Contract Users / Operational Stakeholders

Front line staff who use or receive the service.

Responsibilities

- Report issues, risks, or non-compliance in service delivery
- Participate in user feedback, testing, or acceptance processes
- Monitor operational performance that cannot be seen centrally

Stakeholders/end users contribute to contract and supplier management process by:

- supporting and championing supply chain innovation, continuous improvement initiatives and best practice
- facilitating the validation of end user feedback on contract and supplier performance
- contributing data to allow the monitoring of supplier performance against KPIs and other specified performance indicators
- contributing to performance reviews with the supplier
- participating in the annual performance review

- operational management of compliance, supply, demand and payment at a local level
- managing supplier relationships relating specifically to operational issues
- providing contract/supplier performance data to contract management contributors
- referring supplier performance issues to the Contract Manager
- leading, supporting and championing supply chain initiatives

Supplier-Side Contract Manager

The supplier's accountable representative.

Responsibilities

- Ensures contractual commitments are delivered
- Provides performance data, KPIs, and improvement plans
- Manages issue resolution and escalations
- Ensures appropriate governance and resourcing on the supplier side
- Leads corrective actions and service improvement initiatives

Key Responsibilities Across the Contract Lifecycle

Open or close

Contract Mobilisation (0-6 months)

- Confirm roles, governance, and escalation routes
- Set up KPI dashboards and or balanced scorecard and reporting
- Validate staffing, resourcing, and readiness plans
- Baseline performance and risks
- Ensure alignment with relevant commodity strategies and/or tender documents as appropriate

Business-as-Usual Delivery

- Monthly operations meetings.
- Quarterly performance review meetings
- Annual strategic review
- Continuous improvement and corrective action plans
- Audit compliance checks

Contract Variations and Change Control

- Transparent documentation
- Impact assessments (cost, legal, risk)
- Approval workflows
- Communication to all stakeholders

Contract Risk Management

- Maintain a live risk register.
- Risk scoring aligned with organisational frameworks
- Track mitigations and assurance actions
- Escalate red-rated risks promptly

Supplier Relationship Management (SRM)

- Relationship mapping (operational, tactical, strategic)
- Health checks or relationship assessments
- Joint improvement or innovation workshops
- Annual contract and supplier balanced scorecard

Typical Meeting Structure

Open or close

Monthly Operational Meeting

- KPI review
- Incidents, issues, and progress
- Short-term actions

Quarterly Performance Review

- Full balanced scorecard
- SLA performance
- Financial performance
- Change proposals
- Risk and compliance

Annual Strategic Review

- Value-for-money assessment
- Market comparison
- Business continuity and resilience
- Innovation and sustainability review
- Long-term planning

Documentation Requirements

Open or close

Medium/ high-value, medium/high-risk contracts should maintain:

- Contract Management Plan
 - KPI dashboard and/or [Balanced Scorecard](#)
 - Risk Register
 - Issue Log and Action Tracker
 - Change Control Register
 - Supplier Performance Reports
 - Governance plan
 - Relationship Maps
-

You will find below a **complete Roles & Responsibilities RACI Matrix** and a **detailed Contract Governance Framework** tailored for **medium/high-value, medium/high-risk contracts** in the Scottish public sector.

Everything is presented in clean, reusable formats that you can lift into documentation, frameworks, business cases, governance packs, or commodity/service strategies.

RACI Matrix - Medium/High-Value, Medium/High-Risk Contract & Supplier Management

This matrix is available to download at the bottom of the page and use/amend as appropriate.

Roles included:

- **SRO** – Senior Responsible Owner / Contract Owner
- **CM** – Contract Manager (day-to-day lead)
- **PT** – Procurement/Commercial Team
- **SL** – Service/Technical Lead
- **FIN** – Finance Lead
- **R&A/LEG** – Risk, Assurance & Legal
- **SRM** – Strategic Supplier Relationship Manager (if applicable)
- **SU** – Contract Users / Operational Stakeholders
- **SUP** – Supplier-side Contract Manager

RACI stands for Responsible, Accountable, Consulted, and Informed.

It is a project management tool used to clarify roles and responsibilities within a project:

- **Responsible:** The person or team who actually does the work
- **Accountable:** The individual who is answerable for the correct and thorough completion of the task
- **Consulted:** Those whose opinions are sought; typically, subject matter experts
- **Informed:** Individuals who need to be kept updated on progress or decisions but do not actively contribute to the task

RACI Matrix

Activity / Responsibility	SRO	CM	PT	SL	FIN	R&A/LEG	SRM	SU	SUP
Develop & maintain Contract Management Plan	A	R	C	C	C	C	C	C	C

Contract close-out activities	A	R	C	C	C	C	C	I	R

R = Responsible | A = Accountable | C = Consulted | I = Informed

Contract Governance Framework

Open or close

This framework is suitable for **medium-large public bodies**. It can be applied to any Route 3 contract.

Purpose of the Governance Framework

To ensure:

- clear accountability
- robust risk management
- transparent performance monitoring
- value for money
- compliance with [Scottish Public Finance Manual \(SPFM\)](#), Procurement Journey, and internal governance
- strong supplier relationships while maintaining commercial discipline

Governance Structure

Roles included:

- **SRO** – Senior Responsible Owner / Contract Owner
- **CM** – Contract Manager (day-to-day lead)
- **PT** – Procurement/Commercial Team
- **SL** – Service/Technical Lead
- **FIN** – Finance Lead
- **R&A/LEG** – Risk, Assurance & Legal
- **SRM** – Strategic Supplier Relationship Manager (if applicable)
- **SU** – Contract Users / Operational Stakeholders
- **SUP** – Supplier-side Contract Manager

Strategic Governance

- **Senior Responsible Owner (SRO)**
- Accountable for contract outcomes, risk exposure, financial stewardship and overall compliance.
- Chairs the **Annual Strategic Review Meeting**.
- Approves major variations, renewals, extensions, or commercial settlements.
- Provides updates to Audit & Risk Committee, Board, or Executive Team.
- **Annual Contract Review Board**

Participants:

SRO (chair), SRM (if used), CM, PT, FIN Lead, SL, R&A/Legal, Supplier's senior representative.

Outputs:

- Strategic performance report
- Value-for-money assessment
- Innovation and improvement roadmap
- Re-contracting or extension decision

Tactical Governance

Quarterly Performance Board

Participants:

CM (chair), PT, SL, FIN Lead, R&A/Legal, SRM, Supplier Contract Manager.

Purpose:

- Review [Balanced Scorecard](#) results
- Review SLAs/KPIs, incidents, complaints, quality measures
- Assess risk register, financial position, and mitigation progress
- Track contract variations and change requests

Outputs:

- Quarterly performance pack
- Improvement action plans
- Updated risk and issues log

Operational Governance

Monthly Operations Meeting

Participants:

CM, SL, PT (as needed), SU representatives, Supplier Ops Lead.

Purpose:

- Day-to-day performance review

- Operational issues and incident review
- User feedback
- Short-term action logging
- Verification of KPI data

Outputs:

- Monthly KPI dashboard
 - Issue/action log updates
-

Key Governance Documents

Open or close

Below are some suggested documentation that you should keep on record when managing Route 3 - high value, high risk contracts:

1. Contract Management Plan (CMP)

- Roles and responsibilities
- Governance structure
- KPIs & reporting
- Risk & contingency
- Change control
- Escalation routes

2. Performance Management Framework

- KPI definitions
- Data requirements
- Scoring & weightings
- Balanced scorecard

3. Contract Risk Register

- Strategic and operational risks
- Controls and mitigation
- RAG scoring
- Owner and review frequency

4. Issues & Actions Log

5. Change Control Register

6. Financial Monitoring Sheet

- Budget v. actual

- Forecasting
- Invoice validation
- Indexation tracking

7. Business Continuity & Disaster Recovery Assurance Checklist

8. Stakeholder Communication Plan

9. Exit & Transition Plan

CSM Meetings

Open or close

The below table provides an example CSM meeting plan, this can be downloaded at the bottom of the page and amended as required to suit your contract.

Roles included:

- **SRO** – Senior Responsible Owner / Contract Owner
- **CM** – Contract Manager (day-to-day lead)
- **PT** – Procurement/Commercial Team
- **SL** – Service/Technical Lead
- **FIN** – Finance Lead
- **SUP** – Supplier-side Contract Manager

Meeting	Frequency	Led By	Focus
Daily/Weekly Check-ins (optional for high risk)	As required	CM / SUP	Live operational issues
Monthly Operations Meeting	Monthly	CM	KPIs, incidents, actions
Service/Technical Review	Monthly/Quarterly	SL	Technical compliance, security, testing
Quarterly Performance Board	Quarterly	CM	Performance, risk, financials, change control
Commercial & Finance Review	Quarterly	PT/FIN	Financial performance, benchmarking, contract changes

Meeting	Frequency	Led By	Focus
Annual Strategic Review	Annually	SRO	Strategic direction, VFM, future planning
Additional Senior Escalation Meetings	Ad hoc	SRO/PT	Breach or critical incident
